At Thomaz, we're not just about keeping up with the digital age—we're about leading the way. Our team can guide you through this complex process, helping you leverage technology to revolutionize your business operations. We don't just introduce you to new tools—we help you integrate them seamlessly into your workflows, transforming your processes, and driving unparalleled efficiency.

Take the next step in your digital transformation journey. We're here to help you navigate the future, today.

Our Services

Digital Engineering

Digital transformation is the integration of digital technology into all areas of a business, We can help you hit the key stages in this journey:

- Shifting from 2D to 3D
- 4D and 5D Planning
- Clash Management
- Intelligent MTOs
- Automated Drawing Generation

Training Services

In today's competitive landscape, having a proficient team is imperative. That's why we offer customized training solutions, designed to align with your business objectives:

- AVEVA™ Everything3D Design
- AVEVA™ Everything3D Isodraft
- AVEVA™ Everything3D Draw
- AVEVA™ Administration
- AVEVA™ Cats & Specs
- Training for Manager & Engineers

Customized Solutions

Sometimes, off-the-shelf software misses the mark. You require a customized solution to fit the project needs. Whether it's drawings, isometrics, reports, or any other output, we can help you customize it to fit your specific requirements. We provide tailored solutions, along with the tools and training to enable your team to have full control over your output.

We help engineering teams overcome the complexities of 3D modeling and digital engineering applications, so they can focus on what really matters: delivering your project correctly and on time.

Reach out for an assessment.
